Payment Information

Freeman only accepts payment information electronically. Place your order on FreemanOnline or follow the steps below to provide your payment information electronically and submit your order forms.

Freeman will no longer accept cash payments for any Freeman Services.

1. Submit your payment information

Proceed to our electronic Freeman Pay site to securely submit your payment information
<https://www.freemanpay.com/487105>

2. Submit your order

Upload your order forms through the same link used to submit your payment information

- Both your order and your payment must be received by the discount deadline date to guarantee discount pricing
- Orders received without payment or after the discount price deadline date will be charged at the standard price.
- Copies of invoices may be picked up from the Freeman Service Center prior to show closing.

FREEMAN method of payment

ELECTRICAL SERVICES

From under carpet wiring to overhead lighting, Freeman has the power to simplify your electrical needs and installation. We've answered your most common questions below to help you place your order or prepare for a detailed discussion. Whether you require basic household/office power or a more technical installation for equipment, audio-visual presentations or truss lights, our electrical specialists and qualified electricians are always available to assist you.

How do I know how much power I need?

First, review a layout of your exhibit, noting all of the items in it that require power. Consider lighting, computer equipment, and your own product. Are you bringing or renting any a/v equipment or ordering catering services that might need power? Will you be using a lead retrieval machine? If it's an item that plugs into a standard wall outlet found in a home or office (in North America), it will require 110/120 volt power. 208 or 480 volt power is generally used for machinery or industrial cooking devices and is ordered by single or 3 phase.

Next, mark the voltage and wattage or amperage (referred to as "load") (100 watts = 1 amp) of each piece of equipment at its location in the booth. This information should be provided on a name plate or stamp usually located on the back or bottom of the equipment. If not indicated, check our accompanying electrical usage guide for estimated wattages for common items used at trade shows or call your rental company/caterer for specifics. For lighting, loads are dictated by the wattage of the bulbs. Arm lights included with Freeman exhibit packages use 200 watt bulbs. Keep in mind that you need to order power for any lighting within your booth unless the lights are ordered directly from the Electrical Department (those listed on the Freeman electrical order form).

Finally, total the wattage for the 120 volt devices in each area and select an outlet that meets or exceeds that total. Separate outlets should be ordered for each piece of equipment and/or each power location to help minimize tripping/power outages. It is always safer to slightly overestimate your power requirements. Wattage or amperages cannot be combined for 208 or 480 volt apparatus. Please order separate outlets for each.

Do I need to order labour?

As the official service contractor, electrical installations must be performed by Freeman union labour. Labour is required for any electrical work over and above the delivery of outlets to the back wall of inline booths. Labour orders will automatically be input upon receipt of an electrical layout for under carpet installation (floor work) or to connect any 208 volt or higher services (hook up). Dismantle labour for electrical services is calculated at 50% of the installation time since much of the work is performed on a mass basis after booths are removed from the exhibit hall. Please see the electrical labour order form for further details, rules and regulations.

What is an electrical layout and why do I need one?

Like your own home, electrical boxes and wiring should not be visible once the exhibit is completed. At show site, they are the first things to be installed so that they can be hidden by drape, walls or counters and under flooring or carpet. Electricians, therefore, work on a blank slate. A good electrical layout or floor plan provides them with a simple overhead view of your booth indicating the locations and load of each electrical outlet and the orientation of your booth within the show itself. The layout should be to scale and provide specific measurements to each outlet along with surrounding aisle or booth numbers to ensure accuracy. For island booths, a main power location must also be indicated as it is the location from which other outlets are fed. Please see the sample layouts and electrical grid for further information.

When a layout and credit card are provided in advance, Freeman makes every effort to ensure that the floor work is completed before you arrive so that there is no delay in assembling your booth. Once carpet is laid, installing or changing electrical services becomes much more difficult and potentially costly.

Please note that layouts, complete with mandatory information, are required prior to the deadline date for electrical orders to be eligible for advance rates. Layouts are not required if all outlets are located at the back wall in inline booths.

Is the price for power per day?

Outlet or connection prices are typically for an entire show.

What is 24 hour power?

Many facilities these days are energy conscious and therefore turn off power overnight during show days. Power is turned off 1/2 hour after the show closes at the earliest and restored no later than 1/2 hour before the show opens the following day. 24 hour power is, as it sounds, power that is continuously on 24 hours per day.

If your booth includes, for example, refrigeration equipment, an aquarium or programmable apparatus that depends on uninterrupted power, you should consider ordering 24 hour service. Power is usually not turned off during move-in or move-out.

Where does the power come from?

Depending on the facility, the power can come from overhead catwalks, floor ports, columns, wall outlets or a combination of these sources. Check with the local Freeman branch office for more information.

Where will my power be located?

In-line and peninsula booths will find their main power source on the floor somewhere along the rear drape line of their booth. Island booths need to submit an electrical layout. Please see the sample layouts and electrical grid for further information.

What if I need power at another location besides the rear of my booth? What if I have multiple power locations?

Exhibitors requiring power at any location other than a back wall must submit an electrical layout. Please see the sample layouts and electrical grid for further information.

How many places will I have to plug in? How many things can I plug in?

For planning purposes, you should always assume that there is only one connection point per outlet ordered. Power strips can provide additional sockets but do not confuse having more places to plug in with additional power. For example – An order is placed for a 1500 watt outlet. A track light with 4 – 100 watt bulbs is plugged in to a power strip connected to the outlet, using 400 of the 1500 watts. Any lighting or equipment now plugged in to a second socket may not exceed 1100 watts.

Also keep in mind that power strips are designed, for safety purposes, to trip at 1500 watts or 15 amps. Using a power strip with a 2000 watt (20 amp) outlet will reduce it to a 1500 watt outlet.

All orders exceeding 120 volt/20 amps provide one connection point only cannot accommodate power strips and require labour for installation.

Can I bring my own extension cords and power strips? (Also known as plug strips, multi strips, etc.)

Exhibitors may use their own extension cords and power strips under the following conditions:

- The equipment must be 3 wire, 14 gauge minimum with a ground.
- The extension cords must be flat if they are to be laid under carpet. (Labour is required to lay the cords.)
- All power strips must have circuit protection.

Can I run my extension cords under the carpet myself?

For safety reasons, exhibitors are not allowed to run any electrical wiring under any type of floor covering or where they may be concealed in the booth structure. The show's electrical contractor is liable for electrical installations and therefore must perform all floor or booth work.

Will my floor work be completed before I arrive?

Every attempt is made to have floor work completed prior to carpet installation if you have submitted the following:

- A completed electrical order form.
- A valid and authorized credit card to be kept on file for the company.
- An electrical layout indicating the main power location, dimensions to each power location, the power required at each location, and surrounding aisle or booth numbers to determine orientation of the booth.

Labour and material charges apply.

When will my power be turned on?

Power is only guaranteed to be installed before the show opens. If Freeman is allowed early access to the facility, power is normally ready the first day of move-in for exhibitors but any special requests such as temporary chain motor power, programming machinery or testing equipment should be noted on your order.

Do I need lighting?

Lighting can dramatically change the impact of an exhibit, no matter the size. Used effectively, lighting can emphasize specific areas of a booth or highlight products. Also, an exhibit will appear dark and uninviting if the surrounding booths are lit and yours is not.

Can I hang my own lights?

10 x 10 booths with pop-up displays (a display that can be assembled in less than 30 minutes without tools) can hang their own lights and plug them in without ordering labour. Typically, exhibitors themselves can hang up to 7 lights as long as they require no more than 20 amps in total but it is best to clarify with the local branch. If a decorating company (including Freeman) has been contracted to install a display, electrical labour is required to install the lights. Due to union contracts, no other union is allowed to install electrical equipment.

Do I need to order power for my lighting?

Exhibitors ordering Electrical Services lighting (those listed on the Freeman electrical order form) do not need to order power. It is included in the rental. Exhibitors supplying their own lighting or renting lights need to order power. Labour may be required to hang the lights.

Do I need to order labour to plug in my lights or equipment?

Most 120 volt connections do not require labour. Exhibitors are welcome to plug in their own standard office devices. Labour is required for all 208 or 480 volt connections and if lights or equipment need wiring or if electrical cords are to be run under the carpet or in concealed areas to ensure that all electrical codes and building rules are met.

How can I save money and frustration when ordering electrical services?

Most importantly, be sure to submit your order before the discount price deadline date. If an electrical layout is needed, it also must be received, complete with mandatory information, before the deadline date to be eligible for discount pricing. Late orders can be subject up to a 50% increase in cost because of the behind-the-scenes planning required to distribute power.

Don't underestimate your power requirements and work within the local rules, regulations and union jurisdictions. They have been implemented to avoid problems. While it may seem simple to plug in lights and equipment, it is not uncommon for exhibit or non electrical staff to overload circuits. Trouble calls can become expensive when it takes time to find the source of a problem.

If unsure about labour, call us for direction and if necessary, place a "will call" order before the discount price deadline date. You will only incur a charge if labour is dispatched to your booth but you'll have secured the advance pricing. And, check in with the electrical or service desk as soon as you know you need labour, not at the time you want the electricians in your booth. It will help to avoid delays as we can schedule accordingly.

Lastly, try to resolve any disputes at show site. It is much easier to discuss electrical issues when both parties can physically review the installation.

Additional questions?

Call customer service at the number listed on the Quick Facts and ask for the Electrical Services Department. For fast, easy ordering, tools, and helpful hints go to www.freemanco.com/store.

ISLAND BOOTHS

Electrical layouts are always required for island booths and **must include** the following information:

1. Main Drop.

Since there is no back wall in an island, the exhibitor supplies the location of the main drop, whether one or multiple outlets are ordered. When it will be the point from which power will be distributed to other outlets in the booth, a panel or other piece of electrical equipment (no larger than? x? x?) will be installed at the main drop. For this reason, it is recommended that main drops be located in a closet, under a table/desk or in another area that keeps it out of sight. Measurements must be provided to the main drop.

2. Location and load of all outlets.

Again, dimensions must be provided to all satellite outlets along with the load of each outlet. It is best to indicate voltage, phase and amperage for all outlets once an order exceeds 120 volt service.

3. Booth orientation.

Providing reference points such as surrounding aisle and/or booth numbers defines how an island booth is oriented to the overall show floor plan. In other words, which side is which? It is best to draw your layout relative to the show floor plan so that both are facing the same direction. Examples:

Section of show floor plan

20 x 20 Island – Booth # 401

Order = 1 x 208 volt, 3 phase, 10 amp + 120 volt, 2 x 20 amp + 2 x 5 amp outlets

F R E E M A N

ELECTRICAL SERVICES USAGE GUIDE

The following wattages are approximate and are provided to help you estimate your power usage. To assist in estimating we recommend that you refer to the name plate or stamp usually located on the back or bottom of any electrical apparatus and order the corresponding outlet for each piece of equipment to avoid tripping/power outages during the event.

The formula for wattage is voltage x amperage (120 volt x 1 amp = 120 watts),
5 - 100 watt light bulbs = (5x100 = 500 watts)

Please feel free to contact our electrical specialists at FreemanES@freemanco.com with any additional questions.

| | WATTAGE | | WATTAGE |
|---------------------------------------|-----------------------------|-----------------------------------|--|
| Blender | 475-1000 | Imprinter for T-Shirts | 2000 |

* For double light stands, price includes installation along the side rails of an inline booth. Placement elsewhere will require additional labour and materials. Please contact Freeman for estimated charges.

ADDITIONAL INFORMATION

FOR ADVANCE PAYMENT PRICE

Your order with full payment along with a floor plan indicating main power location and distribution points, if applicable, must be received prior to:

**DEADLINE DATE OF:
JANUARY 7, 2020**

MULTIPLE OUTLET LOCATIONS

A scaled floor plan is required for orders with multiple outlet locations and/or island booths. Detailed examples are provided on the following page. If a power location or main drop is not provided prior to show move-in, a location will be determined by Freeman in order to maintain delivery schedules. Relocation of the service will be charged on a time and material basis.

INLINE AND PENINSULA BOOTHS

Power will be placed in the back of the booth unless otherwise specified.

POSITIONING FLOOR WORK (Installation & Dismantle)

If power is to be installed anywhere other than along the back drape of the booth or if power is to be installed under the carpet, there is a charge of \$65 for straight time (\$90 for overtime) per location drop

24 HOUR SERVICES

If an uninterrupted power supply is required for the full duration of the show, please order 24 hour power. Electricity is turned on 30 minutes prior to show opening and turned off 30 minutes after show closes on show days. Power will be turned off immediately after final show closing. If you require power outside actual show hours, special arrangements should be made in advance. Additional charges may apply.

EUROPEAN EQUIPMENT

Please inform us if you are using European equipment and supply technical sheets

CANCELLATION

A 50% refund will be applied to electrical services cancelled after installation. Refunds will not be issued for materials and/or labour charges related to the installation.

OVERHEAD POWER

If you require your power from overhead, additional materials and labour may be incurred. Please contact freemanottawaES@freemano.com.

TOTAL

| | | | | |
|----------|---|---------|---|-------|
| Subtotal | + | 13% HST | = | Total |
|----------|---|---------|---|-------|

ELECTRICAL INSTRUCTIONS

HOW TO DETERMINE ELECTRICAL REQUIREMENTS

For Equipment

All electrical equipment is stamped or labeled with electrical ratings usually found on the back or bottom of the equipment. Verify voltage and either amperage or wattage from the information provided. Standard office and household items operate on 110/120 volt power. Machinery and equipment typically require 208 or 480 volt power.

For Lighting

Verify the wattage of the bulbs in the lights and multiply by the number of bulbs/lights.

LOCATION OF POWER IN YOUR BOOTH

In-Line and Peninsula Booths

Power will be installed in one location, typically on the floor somewhere along the back of the booth, as indicated in the following diagrams: (We cannot guarantee that the outlet will be specifically located in the middle.)

IN-LINE BOOTHS / PENINSULA

BACK TO BACK PENINSULA

If power is required in locations other than indicated above, secondary distribution will be required and billed on a time and material basis. Please complete and submit an Electrical Labour Order Form with your power order, along with a floor plan as described below.

Island Booths/Multiple Outlets

Floor plans are always required for Island Booths and orders for multiple outlet locations. The floor plan must indicate booth dimensions, surrounding booth numbers for orientation within the facility, each outlet location, required wattage or amperage and location for main drop. If power location in an island booth is not provided prior to show move-in, a location will be determined by Freeman in order to maintain delivery schedules. Relocation of the service will be charged on a time and material basis. See examples below: A grid is available at freemanco.com to print as a base layout.

Island Booth with one outlet

10 X 20 Booth with multiple outlets
Labour Required

OTHER:

1. Labour is required for any and all electrical work over and above the installation of the main power drop. Please see the Electrical Labour form for complete details. Please complete the labour order form.
2. Dismantle labour will be automatically charged at 50% of the installation time and rounded to the nearest half hour.
3. All material and equipment provided by Freeman is for rental purposes only and remains the property of Freeman. All equipment will be removed at the close of the show by Freeman.
4. All equipment regardless of power source, must comply with Federal, State and local codes. Freeman reserves the right to inspect all electrical devices and connections to ensure compliance with all codes. Freeman is required to refuse connections where the exhibitor wiring is not in accordance with local electrical code.
5. Standard wall and other permanent building utility outlets or sockets are not part of booth space and may not be used by exhibitors unless electrical services have been ordered.
6. Exhibitors' cords must be a minimum of 14 gauge 3 wire with ground and must be flat when used for floorwork. All multi-outlet devices (eg - power strips) must have circuit protection. All exposed non-current carrying metal parts of fixed equipment, which are liable to be energized, shall be grounded.
7. Exhibitors' equipment will be modified to conform to Freeman receptacles. Labour and materials to install or change a cord cap will be billed on a time and material basis.
8. Exhibitors with hardwall displays must arrange for power to be installed inside the booth or provide access.
9. Power sharing is not permitted between exhibitors.

OTTAWA HOME & REMODELLING SHOW

LABOUR RATES & SCHEDULE:

Straight Time - 8:00 am - 4:00 pm Monday through Friday
 Overtime - 6:00 am - 8:00am and 4:00pm - 12:00 midnight Monday through Friday
 6:00 am - 12:00 midnight Saturday and Sunday
 Double Time - 12:00 midnight to 6:00 am and recognized Holidays

POSITIONING FLOOR WORK

Electrical placement will be billed as a 'positioning' charge per location. Any rework will be billed as labour, see rates below. Please provide a detailed floor plan with measurements of each drop to avoid any additional charges.

Straight Time: Quantity _____ x \$65.00 = \$ _____
 Overtime: Quantity _____ x \$90.00 = \$ _____
 Example: Quantity: 2 positions x \$65.00 = \$130.00+tax

| Description | Advance Price/Hr | Show Site Price/Hr |
|------------------------|------------------|--------------------|
| Electrician - ST | \$93.75 | \$ 131.25 |
| Electrician - OT | \$ 140.50 | \$ 196.50 |
| Electrician - DT | \$ 187.25 | \$ 262.25 |

Dismantle labour will be charged at 50% of the total install time rounded to the next half hour.

- Show site price applies to all labour orders placed at show site.
- Start time guaranteed only at start of working day.

Review the list of work below to determine if electrical labour is required in your booth. None of the following services may be performed by other Unions or I & D houses as it falls under electrical jurisdiction. Time and material charges will apply. Please visit the Freeman service desk to confirm that you are ready for service.

Note: For more information and an example of a completed floor plan please see the following page.

ELECTRICAL INSTRUCTIONS

- 1 Labour rates are based on current wage scales and are subject to change in the event of a wage increase after rates have been published.
- 2 A minimum charge of one hour is applicable to all labour requests. Additional time on the same day is billed in 1/2 hour increments. Continuations to another day are a minimum of 1 hour.
- 3 Labour must be picked up at the Freeman service desk. Charges for labour commence at time of dispatch to service the labour call. A one hour minimum will apply if an exhibitor representative is not present at the time of call or reschedules the call, unless 24 hour advance notice is received in writing.
- 4 Labour charges will include the time for electricians to gather the necessary tools and material for the job, have their work checked by the client and return the tools and material to the supply area.
- 5 Exhibitors may supply their own 14 gauge 3 wire, extension cords and/or power strips, both of which must be grounded and UL approved.

CANCELLATION POLICY

A 50% refund will be applied to electrical outlets cancelled after installation. Refunds will not be issued for materials and/or labour charges related to the installation.

EXAMPLE OF PLAN AND INFORMATION REQUIRED TO COMPLETE FLOORWORK

Please indicate the following on the floor plan.

1. Location and load of main power drop - please provide specific dimensions and wattages/amperages.
2. Location and load of all outlets - please provide specific dimensions and wattage, amperage and voltage.
3. Booth orientation - please provide surrounding aisle and/or booth numbers.

HANGING SIGN LABOUR AND EQUIPMENT

INSTRUCTIONS

- Overhead hanging signs are to be sent in separate containers directly to advance warehouse using the enclosed Hanging Sign Labels. This container **MUST** arrive by the warehouse shipping deadline. If these procedures are not followed, Freeman cannot guarantee the hanging of your sign or advance pricing.
- All ceiling rigging must conform to Show Management rules and regulations and facility limitations.
- All overhead hanging must be assembled, installed, and removed by Freeman. Please refer to the Freeman Terms and Conditions found in the Exhibitors Services Manual as it relates. Please complete the enclosed Labour Order Form for labour to assemble your hanging sign.
- Set up instructions must be provided for signs needing assembly.
- Hanging anchor points must be pre-fabricated and ready for use.
- Electrical signs must be in working order and in accordance with the National Electrical Code. ELECTRICAL SERVICE requirements must be ordered in advance on the enclosed ELECTRICAL SERVICE Order Form.
- If any hang point supports over 250 lbs., notify Freeman immediately for special authorization.

SIGN DESCRIPTION, SIZE & WEIGHT

- For signs other than banners, include blueprint or drawing with detailed information so hanging anchor points may be determined.

Type: Cloth Banner ___ Metal or Wood ___ Other ___
 Shape: Square ___ Triangle ___ Rectangle ___ Other ___
 Size: Height ___ Length ___ Width ___
 Weight of Sign: _____
 Does Your Sign Require Electricity ___ Assembly ___
 Is Your Sign Designed to Rotate? ___ Yes ___ No
(Initial in the applicable box above)

PLACEMENT DIAGRAM

- Use diagram below to represent your booth space. Indicate how far in from each boundary you would like your sign placed.
- The ceiling structure and relation to the support beams may require your sign to be moved from your specified location.

Number of feet from floor to top of sign: _____

GUIDELINES FOR BANNER HANGING

The following guidelines are in effect at the facility, in order to ensure that all banner hanging in the facility is conducted safely and with due care for the building infrastructure.

FREEMAN is the Exclusive Supplier of Rigging Services for the facility. As such all rigging in the building will be managed by FREEMAN, according to the following procedures. All related costs are available on our Rigging Services Price List.

All banners must adhere to the requirements below. Delays, additional equipment, and labour charges may be incurred by not having the appropriate materials to hang your banner effectively and safely. All Exhibitor sign hanging may be ordered using Freeman Electrical's Sign & Banner Hanging Order form.

1. Banners in excess of 6 feet linear should come with a rigid support for best results when hanging. For banners in excess of 20 feet linear, truss may be necessary to allow the banner to hang safely and correctly. Freeman Electrical Services will notify the owner/hanging party whether truss is required and whether any additional charges may apply.
2. All banners must include grommets and pole pockets.
3. All non-exhibitor banner hanging orders should be placed through Freeman Electrical Services directly at least two weeks prior to the event move-in date. An order will be considered placed and pricing confirmed when Freeman Electrical Services issues a Rigging Order Acceptance Sheet. A diagram showing banner dimensions and placement will need to accompany all orders.
4. Banner hanging placement must be approved by the facility. Please contact your Event Manager directly.
5. facility exterior banners (if permitted) must meet the following guidelines:
 1. Approximately two thirds of the area of an exterior banner should consist of mesh.
 2. Where a banner is made exclusively of vinyl, wind pockets must be built into the banners in order to allow wind to flow through easily.
 3. All edges of banners should have flat-felled seams, i.e., the edges should be folded over, glued, and doubled-stitched.
 4. Mesh banners must be reinforced with webbing in the in the folds before the grommets are affixed.
 5. All corners must be reinforced with webbing before the grommets are affixed as the corners handle most of the stress.
 6. Banners must be made of lightweight, water-resistant, material
 7. In the event of a severe weather notice, banners may have to be removed, or install delayed
 8. All banners must be made to the following specifications in order to be hung:
 - i. Width: 4 ft. – 11 in. (59 inches max)
 - ii. Height/Length: 28 ft. – 6 in.
 - iii. Top/Bottom Pipe Pocket (1 ¼" pipe rod): 5-6 inches depth
 - iv. Each of the (10) mount position includes: (2) single sided Banners & (1) Double sided Banner

CAN WE HELP YOU?

Please don't hesitate to contact us at 613-748-7180 or at freemanottawaES@freemanco.com for any additional information, assistance or product and services information we can provide you in establishing and confirming your event's rigging/electrical/mechanical services.

We value your business and look forward to your call!

RIGGING & OVERHEAD SAFETY POLICY

The following policies and procedures are in effect at the facility, in order to ensure that all rigging in the facility is conducted safely and with due care for the building infrastructure.

FREEMAN is the Exclusive Supplier of Rigging Services for the facility. As such all rigging in the building will be managed by FREEMAN, according to the following procedures. All related costs are available on our Rigging Services Price List.

1. **FREEMAN** can provide, upon request, AutoCAD and PDF scale drawings of all riggable ceilings in the facility. These drawings will show the location and rating of all rigging points, and other relevant ceiling details. These drawings are provided electronically at no charge.

2. Hanging will be permitted only from approved, rated rigging points. Charges for use of rigging points are shown on our Rigging Services Price List.

3. For any event for which rigging is required, a rigging plan must be submitted to **FREEMAN** for approval. This plan must be in an approved printed or electronic format, must be to scale, must show all equipment being hung, and must show the weight load for each rigging point being used. It must show all required rigging points, including cable picks. Charges for plan approval are shown on our Rigging Services Price List.

This plan must be submitted for approval no later than 14 days in advance of the load-in day of the event. In the event that the customer cannot provide a rigging plan, **FREEMAN** is able to produce one. In such cases, there is a consultation process required, so 21 days notice is requested. Charges for plan production are shown on our Rigging Services Price List.

4. **FREEMAN** must perform all work required to attach and de-attach equipment to the rigging points, installed rigging equipment and all equipment flown. No other supplier may do so. Upon approval of the rigging plan and receipt of a production schedule, **FREEMAN** will provide a cost estimate for the labour required to do so. This labour will be charged on an hourly basis, with a 4-hour minimum charge. **FREEMAN** reserves the right to establish the number of riggers required for your event. The number of riggers (minimum 2) and hours will be based on the work to be done. Hourly rates for Rigging Labour are shown on our Rigging Services Price List.

5. All rigging and lift equipment (including but not limited to scissor, boom, chain hoists, chain falls, hangers etc..) must be ordered through, provided and operated by **FREEMAN**. All rigging and lift operation labour must be ordered through and provided by **FREEMAN**.

6. **FREEMAN** reserves the right to disqualify from use any equipment, which in their opinion, does not meet appropriate safety standards. In this event, **FREEMAN** may be able to provide alternate equipment, and will do so upon request, as quickly as possible.

7. All equipment attached to truss, pipe, beam, lighting fixture, or hung in any other manner must be secured by means of a steel safety cable.

8. All suppliers hanging equipment from the ceiling must provide the facility with a Certificate of Liability Insurance showing proof of coverage in the amount of \$2,000,000 per occurrence, and specifically holding harmless the facility and FREEMAN. This must be provided no later than 14 days in advance of the load-in day of the event.

9. **FREEMAN can provide a full range of rigging components including truss and will provide a cost estimate upon request. Prices for rigging equipment are shown on our Rigging Services Price List.**

ADDITIONAL INFORMATION

To honour the Discount Price your order must be remitted **with payment** by the above noted deadline date.

Only an authorized FREEMAN qualified representative is permitted to make a connection to any of the facility's mechanical services sources or termination points.

No mechanical equipment shall be restarted after failure until a FREEMAN qualified representative has found and corrected the malfunction. Service Charges may apply.

CANCELLATION: Cancellation must be made by telephone and accompanied by fax and/or email notification. A 50% refund will be applied on standard listed items on this form if cancelled less than [2] days prior to installation. No refund is applicable to installed services, cancelled on-site, and/or special order items (ie. 208 volt, 220 volt, transformers, generators, compressed air, natural gas, water fill & drain, hot water tanks, etc...).

Service rates quoted include installation to the back centre wall of booth area, services while in use, and removal. If required elsewhere in the booth, a scaled floor plan must be included with orders indicating desired location. Additional labour and material charges may apply.

All services are turned prior to show opening and turned off after show closes on show days. If you require 24hr service operation, please indicate.

Natural Gas is available in limited quantity and in specific limited locations. Use of Propane as an alternate fuel may be permitted subject to facility, TSSA, and Fire Department rules and regulations. For more information, please contact the facility prior to placing your Natural Gas order.

All orders for Natural Gas must comply with current provincial regulations/codes/standards and the manufacturer's certified instructions. Any variation must be accompanied by a certificate/letter from the TSSA (Technical Standards and Safety Authority) approving the variance. Gas Service will not be supplied for any variance unless the above documentation has been provided and TSSA inspection has been completed. The TSSA may be contacted at 1-877-682-8772.

All electrical equipment shall have a nameplate attached thereto showing the operating voltage, phase, hertz, horsepower, kilowatts, full load, and AC or DC current.

Disputes/Claims: All disputes and claims must be settled prior to the official exhibit closing.

SPECIAL REQUIREMENTS

Please don't hesitate to contact us at 613-748-7180 or freemanottawaES@freemanco.com if you require any additional information and/or special services and/or information.
