The EDMONTON EXPO CENTRE values the safety of our customers, visitors, clients and staff. It is with this intent that the EDMONTON EXPO CENTRE has recently reviewed its policies on the use of propane in the building for events and exhibitors. Our goal is to be compliant with the governing Alberta Gas Regulation included in the Provincial Safety Codes. This has been done in conjunction with and under the advisement of the City of Edmonton Fire Department and the City of Edmonton Safety Codes Plumbing and Gas Inspection Group. The Alberta Gas Regulation can be found here: [http://www.gp.alberta.ca/documents/Regs/2010\\_111.pdf](http://www.gp.alberta.ca/documents/Regs/2010_111.pdf)

## **WORKPLACE HAZARDOUS MATERIALS INFORMATION SYSTEM (WHMIS)**

The Workplace Hazardous Materials Information System, or WHMIS as it is often called, is a national system designed to ensure that all employers obtain the information that they need to properly inform and train their employees about hazardous materials used in the workplace.

Through legislation, uniform requirements have been established to ensure the hazards of materials produced, sold, imported or used in the workplace are identified by both suppliers and employers.

A supplier of a “controlled product”, as defined by WHMIS under the federal Hazardous Products Act, must provide detailed information concerning that product in the form of a “Material Safety Data Sheet” (MSDS). Under occupational safety and health legislation employers are also required to provide their workers with hazard information received from suppliers and in respect of controlled products produced in the workplace.

Information must be provided in three ways:

- *Employers must ensure that controlled products used in the workplace are labeled according to WHMIS requirements.*
- *Employers are responsible for obtaining an MSDS for each controlled product from suppliers. MSDS's for controlled products must be readily accessible to workers at each work site.*
- *Employers must ensure that instruction is provided for workers who handle, are exposed to, or likely to handle hazardous materials. Requirements for worker education are comprehensive.*

The above information is intended to make you aware of the Workplace Hazardous Materials Information System legislation.
